

# ANTI PSYCHIATRY

## TRAINING 3

### HOLY WAR [JIHAD]

#### INTRODUCTION

A holy war or *jihad* is a Spiritual struggle against *infidels*. An infidel is one who has no religious beliefs. Psychiatrists are such people. They attack and kill Spiritual people, calling them schizophrenic. They have initiated this war against us. To survive, we must overcome them. Otherwise, they will kill all of us. In the US, psychiatrists are conspiring to kill over 75 million citizens by forcing them to consume slow poisons.

Psychiatrists might best be described as *radicalized atheists*. While anyone should be free to believe anything including obvious silliness like "the earth is flat", it is a different story when a group of believers feel they must force everyone else to think as they do. Psychiatrists, empowered by the government, do exactly that. They search out people whose personality profile is somehow objectionable to them, poison them with deadly chemical agents which shorten their life by about one third and ruin the remainder of their short life with crippling brain damage.

#### TRAINING

It is important for you to learn the truth about the country you live in as well as the truth about other countries and international organizations. You should view this video:

[http://www.youtube.com/watch?v=eDrscByKEUQ&feature=player\\_embedded](http://www.youtube.com/watch?v=eDrscByKEUQ&feature=player_embedded)

OR

Use this link:

[http://amazingdiscoveries.tv/categories&cid=1&c=Total\\_Onslaught&lo=detailed&s=mr&t=a&p=3](http://amazingdiscoveries.tv/categories&cid=1&c=Total_Onslaught&lo=detailed&s=mr&t=a&p=3)

and view video number 211

You should do an internet search using the phrase "neuroleptics shorten life". This will bring you to articles which will explain in detail how your mind and body will be destroyed if you take psychiatric drugs.

You should consult the reference web site <http://www.sntp.net>

## **CONTINUING EDUCATION**

It is important that you have accurate information about what your country is actually doing. You cannot get this information from local news sources because they are all controlled and the news is censored.

To get your daily news, you will need to connect to <http://www.rt.com> and then select the daily news or other documentaries and programs. This news source is beyond the control of the United States.

## **WHAT YOU SHOULD NOW KNOW**

If you have followed the instructions above and completed your training you should now know that the United States is under the control of a group of Satan worshipers who hate GOD and will attack anyone they think may be aligned with GOD.

From your continuing education briefings you should now know that the United States is actively engaged in a conspiracy to take over the world, hunt down and kill any civilization which seeks the true GOD and establish a global dictatorship which will be based upon Satan worship.

## **CIVIL RIGHTS MOVEMENT COMPARISONS**

Comparisons are often drawn between the plight of those under attack by psychiatrists and the plight of black people before the civil rights movement. However, these events are far from identical. Blacks were indeed targeted for discrimination. They were no doubt embarrassed to have to sit at the back of public busses and pick up food at the back door of restaurants because they were not allowed inside. Life as a second or perhaps last class citizen was terrible. However, these inconveniences are not lethal. People targeted by psychiatrists are killed. Once labeled they are marked for death. A lingering death awaits them as the slow poison forced upon them destroys their mind, sterilizes them and eventually sends them to an early grave due to major organ failure. This is really not comparable to the discrimination blacks suffered.

The situation of people targeted by psychiatrists is more closely comparable to the Nazi death camps. Some argue that any protest against psychiatry should be non violent. However, think about this: If you were in line being marched into one of Hitler's gas chambers would you just accept that. Would you

say, "Well, it's the law. I must peacefully walk into the gas chamber. I certainly don't want to resist and be called a law breaker!" Does this crap make any common sense to anyone? You are going to be killed. It's a one way ride. So, if you intend to resist, you better do it in a way that counts.

Remember, the only difference between what psychiatrists do today and what Hitler did is the difference between the definitions of "hard kill" and "soft kill". What Hitler did is known today as hard kill because the people died immediately. Soft kill is the term used to describe methods that kill people but do it slowly and in ways that are not always obvious.

## **INCREDIBLE REALITIES**

Someone goes to a college and gets a degree in psychiatry. They pass a test and get a license to practice. This grants them the absolute authority to go out into society, abduct someone, inject them with poison which will eventually kill them. There is no appeal against this arbitrary authority. There is no effective legal procedure that a person can use to protect themselves from being abducted and killed by a psychiatrist.

How did things get this way? Where did these people come from? How and when did mass murder at the whim of a psychiatrist become the law of the land? Does anyone ask these questions? Why does no one seem to be concerned that psychiatrists plan to kill over 75 million people in the United States? That's over twelve times the number of people Hitler killed and people still can't get over condemning him. So, why are people mysteriously silent about the atrocities committed by psychiatrists? It's all pretty incredible!

## **CONFLICT OF LAWS**

It is hard for the legal system to execute someone. The accused gets a trial and lots of appeals. Also, a judge cannot order the execution. Only a jury can do that.

However, in the parallel justice system of psychiatry, a single psychiatrist can order poison forced on a person which will slowly kill them. Where does this authority come from? Why do people have to submit to this tyranny? The law says they don't. The justifiable homicide law says that any person who reasonably feels that another person intends to cause them *serious bodily harm* has the legal right to use force including lethal force to protect themselves. And, it is a fact that psychiatric drugs do serious bodily harm since it is a fact that these drugs shorten a person's life.

When judges get involved with psychiatrists, they are generally civil judges. Civil judges are not involved with criminal cases which may involve the death penalty. Who are they to order someone put to death by slow poison? They do not have that authority. No judge has that authority. Such an order, if stated in plain language, would be an obvious case of cruel and definitely unusual punishment. So, why are they being allowed to get away with these atrocities which have resulted in the deaths of millions of people at the hands of the psychiatrists?

# **SPIRITUAL BASICS**

People are more than physical bodies. Essentially, people are Souls. Souls are points of awareness with no size or mass as we understand these terms. Their natural home is a place outside of space and time. Souls are said to be imperishable.

When Souls seek activities in one of the created dimensions where time and matter exist, they interface with a form which is suited to that particular area. In the physical dimension, Souls use physical bodies. When they are in the Astral dimension, they use Astral bodies. Physical bodies cannot exist in the Astral dimension. However, the existence of the Astral body as well as other subtle bodies is necessary to the existence of the physical body. In the physical dimension, everyone also has an Astral body. However, it is invisible to most people. The Astral body is the emotional body and is more active when one is experiencing some emotional event.

Psychics can see Astral bodies and communicate with the Astral dimension. Everyone can see these things if they have access to special scanners and filters.

Mainstream science denies that any of this exists. They continue to hold this belief regardless of any evidence presented to them. Psychiatrists help mainstream science keep its false beliefs by hunting down anyone suspected of having psychic abilities, calling them schizophrenic and then brain damaging them into drooling idiots who will pose no threat to "science".

## **THE ASTRAL BODY**

The Astral body is your emotional body. It is a real structure and looks just like your physical body. However, its structure is based upon a different vibrational matrix and so it remains invisible to most people. Everyone has an Astral body. After death of the physical body, the Astral body becomes your primary active body. Normally, it "ascends" to its natural home in one of the Astral planes where your life journey continues.

The Astral body can be damaged just like the physical body. Obviously, for example, if you were shot with a gun, your physical body would be damaged. Blood would run out and harmful agents like germs would run in. Whenever possible, the physical body will do its best to repair itself. Failing this, it will die. Astral bodies do not die as physical bodies do, however they can suffer injuries and, like physical bodies, they will do their best to repair themselves.

Psychiatric drugs damage the Astral body just like a bullet would damage the physical body. They are designed to attack emotions. The Astral body is the emotional body. People who are drugged have "blunted emotions" because their Astral body has been "pierced" just as a physical bullet would pierce a physical body. However, since most people cannot see Astral bodies and since mainstream science

denies that they exist, this damage is not obvious. However, the damage is very real.

If you lose your physical body - die - and you are under the influence of these drugs, your Astral body will not be healthy. At this point, this is your primary body. You need to have the energy to ascend to the Astral plane so that your life journey may continue. It may not be possible to do this if your Astral body is severely damaged. You may find that you cannot leave the near earth zone and must wander around with ghosts and other assorted disembodied spirits.

It is for this reason that it is always better to actively resist an attack by a psychiatrist. You may be killed if you do but your Astral body will be healthy and undamaged and you will be able to ascend into the higher planes.

## **MOTIVATIONS FOR JIHAD**

Jihad events such as suicide bombings are activities which are extremely serious. Obviously, if you choose to be, for example, a suicide bomber, you are going to also be bombed. What would motivate someone to make such a deadly choice. To understand this better we must first realize that jihad is a war between believers and infidels. Believers know a few things that infidels deny. Believers know that life continues beyond physical death. They know that this short period of physical existence is reactively meaningless when compared to all the previous physical lives they have had and all the time they have spent in one of the many nonphysical realities that they know exist. Therefore, physical death is not a great concern to them. However, their unshakable belief in the true GOD is. Therefore, they have no problem choosing death over a situation which threatens this belief.

Infidels, on the other hand, believe that physical reality is the only reality. They believe that they are only their physical body and that physical death is "the end of everything" for them. Therefore, they will do pretty much anything to stay physically alive. Having achieved this, they seek creature comforts and pleasures. And, having achieved this, they turn their attention to other goals such as taking over the world and creating some "perfect utopia" where everyone will be happy because everyone will be forced to believe as they do. They never consider what may await them beyond death because they have convinced themselves nothing is there.

Obviously, there is a conflict of beliefs and so a conflict of life path choices. This conflict is classic and has always existed. In past ages, the balance between the two has been more equal. Unfortunately, today, the odds favor the infidels as they race to complete their grand world plan - the so called "new world order".

## **INSTRUCTIONS TO POTENTIAL JIHADISTS**

Briefly, the instructions given to a prospective jihadist explain to the candidate that he is guaranteed to immediately find himself/herself in a better world than the one they are presently in after death. This basic instruction is not a lie because any world is better than this world. This is especially true if you are

under attack by an enemy which seeks to destroy your culture, pollute your beliefs and corrupt your traditional way of life.

## **CHOICES AND CONSEQUENCES**

If you are attacked by a psychiatrist, these are your fundamental choices and the consequences of your choice:

### **1. SUBMISSION**

If you submit to a psychiatrist and willingly agree to take poison [drugs], you are doomed. Your choice is equivalent to suicide. Suicide is a spiritual crime and there is no hope for your Soul after death. You have chosen to defile and slowly kill your body which is the temple of the Holy Spirit. There is no greater offense. This is the end for you.

### **2. ESCAPE**

If you are able to successfully escape from the psychiatrist, there is hope that you will be able to live free and in a situation where you will be able to realize happiness and self determination. Be aware that any acquaintance you may have who has chosen to submit to a psychiatrist is a danger to you now. Such a person has lost their Soul and belongs to Satan. Stay away from them.

### **3. RESISTANCE**

If you are unable to escape and choose to resist the will of the psychiatrist, you will be attacked in an attempt to force you to submit. You may be killed. However, you will die free. You will be a martyr. Because you refused to submit and died bravely in the battle against Satan, you will be rewarded in the afterlife. Remember, the psychiatrist intends to kill you anyway - one way or the other. When you die in combat rather than in submission, you prove your love for GOD over Satan and you will be rewarded.
