

CHOICES AND CONSEQUENCES

OVERVIEW OF YOUR SITUATION

You have been captured by an extremely dangerous Agent of Satan known as a Psychiatrist. There are about 57,000 of these wingnuts roaming around the United States and the government allows them to abduct people and do whatever they want to them. They are allowed to "self certify" that whatever they do is correct. In other words, they are a law unto themselves and exist outside the normal justice system (extrajudicial).

At their annual meeting, they determine who is to be killed (abnormal) and who is to be allowed to live (normal). This is done in secret by a vote among the members of this Satanic cult. Definitions of "normal" and "abnormal" are not fixed and are subject to change based upon the majority opinion of the cult members. No legitimate scientific process is used to reach these conclusions. It is all based upon the "expert" opinions of the cult members.

These people believe that about 80 Million US citizens are "defective" and it is their intent to kill these people using slow poison. There is no known effective legal method to stop a psychiatrist from attacking you and eventually killing you. Therefore, if you want to live, you need to defend yourself. If you fail, you will die. Statistical evidence clearly proves that people taking psychiatric drugs die approximately 25 years sooner than those who do not.

UNDERSTANDING PHYSICAL DEATH

Physical death is not the end of your existence. Birth was not the beginning of your existence. You are an immortal creature and will live forever, however the quality of your existence can vary from extremely good to downright miserable depending upon circumstances.

Normally, at physical death, you leave your physical body behind and use your Astral body. You have this body now and can learn to use it while you are physically alive. This is called Astral Projection and many people do it and have throughout human history. However, psychiatrists call Astral Projection "disassociation" and believe it to be one of their 300+ invented "illnesses" so - if they catch you - they will damage you with various poisons so that you can't do this anymore.

UNDERSTANDING ASTRAL DAMAGE

To effectively function after physical death, your Astral body must be complete and healthy. For example, if someone cut off your arms and legs and then took out your eyes and ears, you would still be physically alive but not very functional. Now, your Astral body can also be damaged. It will not die but it will exist in a state of diminished capacity. Psychiatric drugs essentially "punch holes" in your Astral body. Psychics can see this and so can you if you have access to special scanners such as Kirlian Photography which photographs the human aura. Obviously, if someone started punching holes in your physical body (like with an ice pick), you would not be feeling too good either. The psychiatric drugs use high energy molecules such as Fluorine to punch holes in your Astral body. Therefore, when you die and try to function using your Astral body - which is now your primary body - you find it non responsive. If you do not have the energy to open the portal (generally seen as a "whirling tunnel") which will take you to the Astral dimension, then you will be stuck here on Earth as a disembodied spirit or "ghost".

Your Astral body is also called your "emotional body". Psychiatrists want to destroy your emotions so you will become docile and submissive. Some know the Astral damage they are doing but many do not. As "scientific atheists" they are oblivious and believe nothing exists other than observable physical things.

DEFINITION OF AN "AGENT OF SATAN"

Classically, Satan is the enemy of God and, therefore, will try to stop you from returning to God (your Father) using any method possible. Psychiatrists meet the definition of an "Agent of Satan" because they use sophisticated chemical poisons to damage both your physical body and Astral body so you will be incapable of "ascending" when you physically die.

In past times, these people were known by various names such as black Witches, Sorcerers, Voodoo practitioners and so on. When detected, they were normally burned at the stake. However, the US government - known throughout the world as the "Great Satan" - protects these people and allows them to freely operate.

QUALITY OF YOUR DEATH

If you have been abducted by a psychiatrist, there is a 100% chance that you will be murdered by slow poison. What you choose to do about this determines the "quality" of your death. Once stamped with a "label" by a psychiatrist, death is certain. However, before you die, you will experience indescribable torture - 24 hours a day - while the poison slowly destroys your body and mind.

YOUR OPTIONS

Escape

Escape is obviously your best option but may not be easy or even possible. If you do escape, you need to find a new home somewhere where psychiatrists cannot find you and attack you again.

Submit

If you willingly submit to a psychiatrist you have surrendered to Satan. You will die without honor. There is no hope for you now. When you die, your death will be classified as suicide by the Lords of Karma who will judge you. Therefore, you will have to pay the penalty for suicide which is perpetual isolation. You will be placed in an isolation cell. You will never see or be able to communicate with anyone. If you try, your punishment will be extended. Your physical body is a Holy Vessel provided by the will of God. If you intentionally destroy it, you have spurned the will of God and now you must pay.

Resist

If you are unable to escape but do your best to resist the attacking psychiatrist you will still be killed but you will die with honor since you made your best effort.

Myrtardom

The theory of myrtardom asserts that, even though you would not normally be eligible to enter Heaven, if you kill an agent of Satan and die in combat, you will become a candidate for martyrdom and eligible for "special grace" from God which will give you immediate access to Heaven. The agent of Satan will return to Hell where it belongs. This is considered an honorable death.
