

# YOU NEED TO KNOW

## There is NO Difference Between What Psychiatrists Do Today and What the Nazis Did

Hitler made a list of people he thought should be killed to "make the world better". Then he rounded them up and methodically killed them.

Psychiatrists do the same thing. The DSM book is a list of over 300 vague descriptions of personalities that they feel should be exterminated. If you fit any one of these, it is legal for a psychiatrist to kill you with slow poison. Before the DSM, many psychiatrists used a handbook printed in the 1940's called "Outlines for Psychiatric Examinations" by Nolan DC Lewis. It was only circulated among psychiatrists and was much more specific as to who should be killed. It specified, among others, to be on the lookout for "litigious persons, reformers and prophets". Obviously, these are the classes of people any totalitarian government would want to kill.

## How Psychiatric "Illnesses" Originate

When psychiatrists have their convention, they vote on what should be called an illness. They can vote to create new illnesses or vote to uncreate old illnesses. Then they publish their decisions in the DSM. It is no different than, say, a group of Bishops voting on what should or should not be a "sin". There is no legitimate scientific test for any of the over 300 psychiatric "illnesses". Everything is based upon "opinion" of the observer.

## Psychiatry is a Pseudo Science Hiding Behind Legitimate Medical Science Which Behaves More Like a Religion than a Science

Witchcraft trials, religious crusades and the "Inquisitions" were all efforts to "cleanse" society by some group that felt their view of life was correct and any opposing it should be killed. Psychiatrists do the same thing. Any single psychiatrist can easily kill 10,000 people or more during the course of its career. In the US, psychiatrists want to kill over 80 million people they feel are "defective".

## The Evidence is Now Clear

Statistical evidence now shows that people taking psychiatric drugs are dying about 25 years sooner than others who do not. Professional football players die about 20 years sooner than others but that is because of all the head trauma they suffer playing. Also, it is their choice and they are well paid. Psych patients are not paid, have no choice and generally die in poverty.

Robert Whitaker's book, "Anatomy of an Epidemic", uses medical statistics to prove that people with

problems who work through them on their own or with the help of friends have a good chance of recovering while others who chose to get involved with a psychiatrist generally never recover.

So psychiatry will shorten your life by 25 years and pretty much guarantee that you will never recover from whatever problem you have - not a great outlook!

### Psychiatric "Treatments" will Damage your Astral Body and the Harm Will Follow You Into the Afterlife

Psychiatric drugs do much more than ruin your physical body. They also damage your Aura and Astral body. Your Astral body will be your active body after you die so damaging it degrades your existence beyond death in the Afterlife. To deliberately do this - as psychiatrists do - is a crime against GOD and is considered to be black magic. This is why we say psychiatrists are agents of Satan and enemies of GOD. There is much information available on the internet about your Aura and Astral body if this subject interests you.

### MKULTRA Empowerment

During the MKULTRA period from about the 1950's through the 1970's, the specific instructions given to researchers by the CIA were, "Go and seek out people on the fringes of society - who, therefore, lack the capacity to resist - and use them for medical experiments". Most were killed. Few survived. "National Security" shielded doctors and others from ever facing justice.

Although these projects have mostly ended, the sense of "special empowerment" doctors enjoyed has lingered on and they still feel "privileged" that they can do whatever the please to anyone with impunity.

### The "Recovered Memory" Scam

You may recall this scam which was popular years ago: Psychiatrists would charge a person money to "recover" memories of their childhood. The "recovered memories" showed that they had been sexually abused as a child by their parents. The psychiatrist was then paid again to testify against the parents in court and have them sent to prison. This worked out well until they ran into parents who had the resources to defend themselves and were able to show that the "recovered memories" were actually "implanted memories" of events which never actually happened. Once the scam was exposed, psychiatrists quietly stopped "recovering" memories.

Apparently, no one was prosecuted. Psychiatrists made lots of money but, in the process, destroyed the lives of the parents and child. Not to worry though - it just shows they were "successful capitalists" in a system where making money any way you can is more important than human life.

### The Brady Precedent

James Brady, who was shot in the head during the attempted assassination of President Reagan, recently died. Even though it had been over 30 years since his injury, the coroner ruled his death a homicide because the injury caused premature death. WHAT THIS MEANS is that anyone who has ever been forced to take psychiatric drugs - which are known to cause premature death - can now have their deaths ruled as homicide and the psychiatrist(s) involved could be charged with murder.

### Your Fate as a Patient

Someone who does not approve of your beliefs, attitude or lifestyle will alert a psychiatrist who will then order you to be abducted and delivered into his clutches for "treatment"

Now the deadly slow poison will be administered. It will begin to eat away at your body and mind. There will be no escape. Twenty-four hours a day - every day - every night. You will feel it as it destroys you. There will be a strange inner restlessness that never stops. You will know no peace. Other more obvious effects may occur. Young boys may begin to develop as girls. You will be sterilized. Men will be impotent. Women will stop having periods and will not be able to have orgasms. The ability to experience any pleasure will be destroyed. Emotions will be eliminated. You will now simply exist as a vegetable. Slowly, all your memories will be erased. There will be no past and no hope for your future. If you try to resist you will be sent to a concentration camp and forced to submit. Eventually, you will be sold to a nursing home. They will continue to give you poison until you finally die.
